

T3main is an innovative and comprehensive telephony solution harnessing the best technologies in the telecommunications industry. A unique single-platform approach provides flexible voice and data capabilities to support a variety of location sizes, regional requirements and technology infrastructures.

T3main Unified Messaging provides instant access to voice messages, email and faxes from any location. With a simple keystroke, you can easily manage voice and fax messages from your email inbox. Email messages and faxes can just as easily be accessed through any telephone using Text-to-Speech. T3main conveniently administers all messages behind the scene, ensuring voice mailboxes and email inboxes are perfectly synchronized.

T3main Unified Messaging is a POP3 and IMAP server that can be used with any email client environment including Outlook® and Outlook Express®, Lotus® Notes®, or web-based clients such as Microsoft® Hotmail®.

T3main Unified Messaging Advantages

Desktop access

- Message information is displayed in your mail inbox including name and mailbox number of the sender, caller ID and duration of voicemail, fax sender information and number of pages.
- Voice messages can be listened to with any WAVE player, and fax messages can be viewed with any TIFF image viewer.
- Managing voice and fax messages is as easy as managing emails. Forward your voice and fax messages to any email address, and archive messages to any local folder.

Telephone access

- Emails and faxes are conveniently accessed through your personal voice mail box and are read back through a natural sounding text-to-speech converter.
- Flexible email management allows you to listen to, delete, save, reply to, and forward emails as text-to-speech, voice mail, or fax.
- Fax messages can be redirected to any fax machine directly through your voice mail box. Additional flexibility enables direct transmission of a fax through a fax phone.
